EDUCATION

Sri Eshwar College of Engineering	**B.Tech (AI & DS) | CGPA: 8.5/10 (≈3.4/4.0)**	**2024 - 2028**
Oxaliss International CBSE School	**HSC: 92.2%**	**2023 - 2024**
Oxaliss International CBSE School	**SSLC: 96.4%**	**2021 - 2022**

SKILLS

Languages: C, C++, Python, JavaScript, TypeScript, SQL

Frameworks: React.js, Redux, Next.js, React Native, Tailwind CSS, Node.js, Express.js, FastAPI, Flask, REST APIs

Databases & Tools: PostgreSQL, MongoDB (NoSQL), Git, GitHub, Postman, Vercel, Figma, Kafka, Docker, Kubernetes

AI / Gen AI: Gemini API Integration, Machine Learning, Predictive Analytics, Feature Engineering, Prompt Engineering

CS Core: Data Structures & Algorithms (250+ LeetCode problems, 1613 rating), Object-Oriented Design, Algorithm Complexity Analysis, Operating Systems, Computer Networks

CODING PROFILES

- **LeetCode:** Solved 250+ data structures and algorithms problems | Contest Rating: 1613
- **SkillRack:** Solved 1100+ programming problems | Earned 310+ Bronze medals
- **CodeChef:** Solved 350+ competitive programming problems

ACHIEVEMENTS

- **PayPal Mentorship Program – PayPal** Link**:** Selected to participate in the PayPal Mentorship Program, gaining industry mentorship from experienced software engineers with exposure to modern development practices, career strategies, and real-world engineering workflows.
- Selected for the **Tata Innovent National Hackathon from more than 7,000 project submissions, with only 108 projects being selected.**
- **FLY TO SINGAPORE 12.0 Qualifier – RYLA:** Selected as a qualifier for FLY TO SINGAPORE 12.0 through the RYLA 54.0 position-based selection, recognizing performance in entrepreneurship, business planning, presentations, and leadership activities.
- **Finalist – InnoHack Hackathon, VIT University:** Reached the finalist stage at InnoHack by developing an innovative technology solution and presenting it before a panel of industry experts.
- **Second Prize – Creatathon (2025):** Recognized for standout creativity, problem-solving, and engineering impact in project implementation.
- **Second Prize – Freshathon (2025):** Secured runner-up position in an inter-college hackathon by developing an innovative technical solution under strict time constraints.
- **Second Prize – Web Design Showdown (2025):** Awarded for excellence in UI/UX design and front-end development in an inter-college web design competition.

INTERNSHIP

Infoziant — MERN Stack Developer Intern Link **Dec 2025 – Jan 2026**

- Improved development velocity and cut UI rework by engineering 15+ reusable React components, applying object-oriented, component-based design principles across a shared codebase in a fast-paced, self-directed onboarding.
- Strengthened reliability and performance under concurrent multi-user load by designing and integrating RESTful APIs (Node.js/Express.js) with optimized MongoDB (NoSQL) schemas, validating functionality through structured manual test cases in Postman ahead of each deployment.
- Reduced integration risk within a cooperative, agile-style team environment by building concurrent, asynchronous multi-user API endpoints, incorporating peer feedback and iterative code review to strengthen CRUD reliability.

PROJECTS

DrivePortz — AI-Powered Mobility Digital Twin Platform Link **Mar 2026**

React.js, Node.js, Express.js, MongoDB Atlas, Gemini API (Freelance Project)

- Delivered end-to-end vehicle lifecycle management (service, insurance, ownership, maintenance) by engineering a full-stack MERN platform featuring Vehicle Passport — a QR-based digital vehicle identity with Cloudinary-backed cloud storage for verified records.
- Secured multi-role access for Users, Garages, and Administrators by implementing JWT/bcrypt authentication with OTP-based recovery, and extended platform reach with a geolocation Garage Marketplace (Google Maps API) and an admin analytics dashboard for user, garage, and revenue insights.
- Built two Gen AI features on the Gemini API — an AI Vehicle Doctor that converts diagnostic codes into plain-language probable-cause and repair-cost estimates, and a multi-agent CoPilot Assistant for personalized insights and emergency roadside assistance.

Trackit — Smart Product Inventory System (Gen AI) Link **Nov 2025**

Next.js, Tailwind CSS, Shadcn UI, Python, Flask, MongoDB

- Enabled secure multi-user workflows by engineering a full-stack smart inventory platform with role-based access control for administrators and customers, using Next.js, Flask, and MongoDB, validated through manual UI testing across admin and customer roles.
- Cut manual stock-monitoring effort by implementing QR-code and manual product entry with automated expiry-date tracking and reminders.
- Improved purchasing and inventory decisions by building predictive analytics for demand forecasting and data-driven dashboards from historical sales data.

SepsisSense — Sepsis Detection & Early Warning System Github **Feb 2025**

Python, Machine Learning, Pandas, NumPy, Flask, Streamlit

- Enabled timely clinical intervention for high-risk patients by building a recall-optimized risk-classification system, engineering features from 1.3M+ hourly ICU records across ~40,000 patients in the PhysioNet 2019 Challenge dataset.
- Achieved 90% classification accuracy by training and evaluating multiple ML models with a focus on recall, validated via train/test split analysis and manual review of borderline cases.
- Delivered real-time clinical decision support by deploying an interactive interface using Streamlit and Flask.

CERTIFICATIONS Link

Python Programming Certification	**G-TEC**	**2024**
Artificial Intelligence & Machine Learning Certification	**Corizo**	**2025**
C and C++ Programming Certification	**IIT Bombay**	**2025**
Mastering Data Structures and Algorithms in C and C++	**Udemy**	**2025**
Design Thinking – A Primer	**NPTEL**	**2026**
